PILAR SANTOS

Junior Software Engineer

I am a Junior Software Engineer with experience in technologies such as Java, JavaFX, Spring Boot and React, building both desktop applications and web projects. I really enjoy learning from the teams I work with and taking on challenges that help me grow. I am looking for a company where I can contribute from day one and continue developing as a software developer.

PROFESSIONAL EXPERIENCE

Software Engineer — TP ICAP (Madrid) *MAR 2026 – MAY 2026*

- Full development of an internal inventory management application using JavaFX with a MySQL database containerized via Docker.
- Contributed to the maintenance and improvement of internal tools built with React and Spring Boot, including UI enhancements and bug fixes.
- Provided technical support to trading teams, resolving hardware and software issues in real time.
- Participated in the full development cycle: design, implementation, testing, and deployment.

Web Developer / ERP — Burofree AI *MAY 2025 – JUN 2025*

- Configuration, management and use of ERP systems.
- Web development combined with the configuration and management cycle of ERP tools.
- Frontend development integrated with the project's ERP systems.
